

TALENTO

Documentation Update — Missing Sections

Sections added to align Documentation with Figma Design System

5. Color Palette

Talento uses a carefully crafted palette built around the brand's Gold and Navy identity, extended with semantic colors for trust, status, and AI feedback.

5.1 Primary Brand Colors

Name	Hex	Swatch	Usage
Talento Gold	#D4A574		Primary brand color, CTAs, highlights
Gold Dark	#C99659		Hover states for primary buttons
Gold Light	#E5B680		Subtle backgrounds, accents
Navy Blue	#1A2B3D		Main background (dark), headings
Navy Light	#2A3B4D		Cards in dark mode
Navy Dark	#0F1D2E		Deep background dark mode

5.2 Semantic Colors

Name	Hex	Swatch	Usage
Trust High	#10b981		80–100 score: Trusted users
Trust Medium	#f59e0b		50–79 score: Verified users
Trust Low	#ef4444		0–49 score: New users
Success	#10b981		Completed sessions, positive actions
Warning	#f59e0b		Slight imbalance alerts
Error	#ef4444		Critical imbalance, errors
Info	#3b82f6		Informational messages

5.3 CSS Variables

```
/* Primary */
--primary: #D4A574;
--primary-dark: #C99659;
--primary-light: #E5B680;

/* Navy */
--navy: #1A2B3D;
--navy-light: #2A3B4D;
--navy-dark: #0F1D2E;

/* Trust Score */
--trust-high: #10b981;
--trust-medium: #f59e0b;
--trust-low: #ef4444;

/* Gradients */
--gradient-primary: linear-gradient(135deg, #D4A574 0%, #C99659 100%);
--gradient-navy: linear-gradient(135deg, #1A2B3D 0%, #0F1D2E 100%);
```

6. Trust Score System

The Trust Score is Talento's core credibility mechanism — a transparent, data-driven number (0–100) that reflects a user's reliability and teaching quality. Every factor is visible to the user.

6.1 Score Formula

```
Trust Score = (
  Completed Sessions  × 0.30 +
  Avg Rating          × 20   +
  (100 - Cancel Rate) × 0.40 +
  Response Speed Score × 0.30
)
```

6.2 Score Breakdown

Metric	Weight	Description
Completed Sessions	0.30	Total sessions finished successfully
Average Rating	× 20	Star rating converted to 0–100 scale
Cancellation Rate	0.40	Lower rate = higher score contribution

Response Speed	0.30	How quickly user responds to messages
----------------	------	---------------------------------------

6.3 Trust Tiers

Score Range	Status	Color	Meaning
80 – 100	Trusted	Green (#10b981)	Verified expert, high reliability
50 – 79	Verified	Amber (#f59e0b)	Active user, growing reputation
0 – 49	New	Red (#ef4444)	New user, limited history

6.4 Visual Display

- Large animated SVG circle (stroke animates on mount — 1000ms)
- Color-coded ring based on score tier
- Status label below the circle (Trusted / Verified / New)
- Full metric breakdown panel showing exact numbers
- 8-week history bar chart with gold gradient bars
- Verification badge: green gradient + 'Verified Expert' label

7. AI Matching System

Talento's matching engine uses a multi-factor algorithm to recommend compatible skill exchange partners. Every match is explainable — users can see exactly why they were matched.

7.1 Algorithm Factors

Factors are weighted by importance. The final match score (0–100%) is a weighted average:

Factor	Weight	Description
Rating Score	95%	Teaching quality from peer reviews
Mutual Benefit	92%	Fairness of the skill exchange
Skill Overlap	90%	Your wants match their offers and vice versa
Response Rate	80%	Communication speed and reliability
Level Similarity	85%	Experience levels are compatible

Availability Match	75%	Time zone and schedule alignment
--------------------	-----	----------------------------------

7.2 Confidence Levels

Every match card displays a confidence indicator showing how certain the AI is about the recommendation:

Level	Dots	Range	Meaning
High	●●●	90%+ confidence	Strong match across all factors
Medium	●●○	60–89% confidence	Good match, minor gaps
Low	●○○	Below 60%	Potential match, verify manually

7.3 Explainable AI — 'Why This Match?'

Every match card has an expandable 'Why this match?' section showing:

- Skill Overlap % — gold animated progress bar
- Level Similarity % — green animated progress bar
- Mutual Benefit % — amber animated progress bar

All progress bars animate on expand (1000ms transition). No AI decision is hidden.

7.4 Smart Badges

Badge	Color	Trigger Condition
Best Exchange Balance	Green	Mutual benefit score $\geq$ 90%
Level Match	Blue	Experience levels are very similar
High Demand Skill	Purple	Skill is trending on the platform
Quick Responder	Amber	Response time under 1 hour
Similar Timezone	Teal	Within 2 hours time difference

8. Time-Based Contracts

Contracts are Talento's fairness mechanism — a formal agreement between two users to exchange equal hours of teaching. The system tracks balance in real time and alerts users when exchange becomes unequal.

8.1 Contract Structure

```
User A teaches [Skill X] for [Y hours]
User B teaches [Skill Z] for [Y hours]
Duration: [Start Date] → [End Date]
```

8.2 Balance States

The fairness indicator at the top of the contract screen shows the current balance status:

State	Condition	Color	UI Label	Action
Balanced	0 hours difference	Green (#10b981)	✓ Perfectly Balanced	No action needed
Slight Imbalance	1 hour difference	Amber (#f59e0b)	△ User A ahead by 1h	Amber warning shown
Unbalanced	2+ hours difference	Red (#ef4444)	⚠ User A ahead by 2h+	Alert + scheduling recommendation

8.3 Session States

State	Icon	Description
✓ Completed	Green icon	Session finished and confirmed
 Upcoming	Clock icon	Scheduled within 24 hours
 Scheduled	Calendar icon	Booked for a future date

8.4 Smart Alerts

When balance becomes unequal, the system automatically shows:

```
⚠ Balance Notice
User A is ahead by 2 hours.
Consider scheduling more sessions to maintain fair exchange.
```

8.5 Contract UI Layout

- Split view: User A | User B side by side
 - Dual progress bars showing hours completed vs total
 - Session list per user with status icons
 - 3-stage timeline: Started → In Progress → Complete
 - CTAs: 'Mark Session Complete' (gold) + 'Request Adjustment' (outline)
-

9. Glassmorphism & Visual Effects

Glassmorphism is Talento's signature visual style — semi-transparent cards with blur effects that create depth and a premium feel on both light and dark backgrounds.

9.1 Glass Card (Light Mode)

```
.glass {
  background: rgba(255, 255, 255, 0.7);
  backdrop-filter: blur(10px);
  -webkit-backdrop-filter: blur(10px);
  border: 1px solid rgba(255, 255, 255, 0.18);
  box-shadow: 0 8px 32px 0 rgba(31, 38, 135, 0.15);
}
```

9.2 Glass Card (Dark Mode)

```
.dark .glass {
  background: rgba(26, 43, 61, 0.7);
  border: 1px solid rgba(212, 165, 116, 0.1);
  box-shadow: 0 8px 32px 0 rgba(0, 0, 0, 0.5);
}
```

9.3 AI Glow Effect

Applied to AI-powered components (match cards, AI badges) to signal intelligent features:

```
.ai-glow {
  box-shadow: 0 0 20px rgba(212, 165, 116, 0.4);
  transition: box-shadow 300ms cubic-bezier(0.4, 0, 0.2, 1);
}

.ai-glow:hover {
```

```
box-shadow: 0 0 30px rgba(212, 165, 116, 0.6);  
}
```

9.4 When to Use Glass

- Match cards on the AI Dashboard
- Profile Trust Score panel
- Chat message bubbles (received messages)
- Modal overlays (BookingModal, RatingModal)
- Sidebar widgets in Chat screen

9.5 Spacing System — 8pt Grid

All spacing follows an 8pt grid. Values are multiples of 4px starting at 4px:

```
--space-1: 4px /* Tight: icon-to-label gaps */  
--space-2: 8px /* Small: within-component padding */  
--space-3: 12px /* Medium compact */  
--space-4: 16px /* Standard spacing */  
--space-5: 20px /* Medium */  
--space-6: 24px /* Section padding */  
--space-8: 32px /* Large gaps */  
--space-10: 40px /* Section breaks */  
--space-12: 48px /* Large sections */  
--space-16: 64px /* Page-level spacing */
```

These sections complete the Talento System Architecture Design Document.
